Pact has many perks for Lea

NMJC partnership with Albuquerque-based solar power firm brings guidance, business to Lea

The NMJC-Sacred Power partnership and an energy park at the college Wednesday afternoon. Fialho, vice president of business development for Sacred Power, is now a student at NMJC and serving as an adjunct faculty.

“About a year-and-a-half ago, I had never been to Hobbs,” he said. “I probably would have had a hard time finding it on a map.”

NMJC vice president for training and outreach, Jordan Sholes, contacted Sacred Power to explore the possibility of using the company’s expertise in solar power to enhance the college’s alternative energy program.

Initially, Sacred Power would set up solar panels for the alternative energy program and guide students. The idea grew into a full-blended partnership during the past 18 months.

Fialho said Sacred Power, which is based in Albuquerque, was considering expanding in the state. When the NMJC opportunity came up, the company eventually opted to open an office in Hobbs.

Fialho, who moved to Hobbs a few weeks ago, also enrolled in NMJC’s energy technology program.

He thanked NMJC staff for inspiring him to go forward with his original application,” Gallagher said during Wednesday’s County Commission meeting.

The county’s new liquid waste disposal ordinance will go into effect Sept. 22 or Sept. 23, Gallagher said.

If the ordinance is in effect before the state Environment Department receives new plans for Rancho Dal Paso, the property owner must apply to Lea County for a liquid waste disposal permit in addition to a state liquid waste disposal permit. Gallagher said it is possible that the property owner changed plans for an open sewage lagoon to another.

back to school.
“It’s probably been about 20 years since col-
lege was the focus of my life,” he said. “But now
I want to finish a bachelor’s degree and an
MBA.”
Sacred Power joins DCP Midstream,
Marathon Oil Corporation, Lockheed Martin,
the New Mexico Environmental Depart-
ment, the J. F Maddox Foundation, the New Mexico
National Guard, Lea County Electric
Corporation and NMJC, among others, to make
the college’s energy park a reality.

The businesses joined the state and NMJC to
set aside a portion of the college’s land for wind
and solar installations Rhodes said the equip-
ment is not only for practice for NMJC stu-
dents, but will also provide the campus with
electricity.

Sen. Carroll Leavell, R-Jal, praised the part-
nership and NMJC energy park.
“It’s going to take all types of energy to meet
the needs of the next 30 to 40 years,” he said.

Rep. Shirley Tyler, R-Hobbs, said the energy
park represents “an awesome vision.” NMJC
staff and board members created for the col-
lege.
“This is a tremendous opportunity,” she said.

NMJC president Steve McCleery said the ener-
gy park is the result of synergy — many parts
working together to be a greater whole.

“Lea County has the unique opportunity to be
something special,” he said. “We have to capi-
talize on every bit of energy that is coming
together.”

Fialho said he is excited to be a part of the
EnergyPlex.
“It’s a package... of all different technologies
working together,” he said.
